17 #36385A	18 #1E091E		

How to use your markers

1. Work from colour 1 (lightest) to colour 18 (darkest), one colour at a time.
2. For each area, first trace its outline with the marker tip, just inside the printed line.
3. Then fill it with straight, parallel strokes in one direction, each stroke slightly overlapping the last.
4. Keep a light, even pressure and do not go back over ink that is already dry: that leaves streaks.
5. Let light colours dry before painting the dark colours next to them.
6. Grey areas are the linework and take colour 18. White areas without a number stay unpainted.
7. Areas too small for a number are shown in the step-by-step guide (HTML file).
8. The name and the signature are already printed: leave them as they are.
