9 #52807A	10 #408556	11 #835F4A	12 #386E5E
13 #2C5C60	14 #1B5518	15 #4C4260	16 #443322
17 #2A3740	18 #030606		

How to use your markers

1. Work from colour 1 (lightest) to colour 18 (darkest), one colour at a time.
2. For each area, first trace its outline with the marker tip, just inside the printed line.
3. Then fill it with straight, parallel strokes in one direction, each stroke slightly overlapping the last.
4. Keep a light, even pressure and do not go back over ink that is already dry: that leaves streaks.
5. Let light colours dry before painting the dark colours next to them.
6. Grey areas are the linework and take colour 18. White areas without a number stay unpainted.
7. Areas too small for a number are shown in the step-by-step guide (HTML file).
8. The name and the signature are already printed: leave them as they are.
